

Debian_logs

All explained here:

<http://www.debian-administration.org/articles/117>

All Default Logs are configured via this Conf file:

/etc/syslog.conf

A Special Log File called admin.log is setup to catch Important information such as Failed Logins etc.

Edit /etc/syslog.conf and include:

```
*.emerg /var/log/admin.log  
*.alert /var/log/admin.log  
*.crit /var/log/admin.log  
*.err /var/log/admin.log  
*.warn /var/log/admin.log
```
