

## Limit\_User\_resources

### 1. As root:

```
vi /etc/security/limits.conf
#add the following line, where steve is the user:
sburke hard nproc 5
#save and close the text editor.
#The user will not be able to run more than 5 processes at the same time.
```

### 2. ssh sburke@localhost

```
ps -eaf | grep sburke | ls /var/tmp | less
-bash: fork: Resource temporarily unavailable
```

---
